

EKMF Web Virtual Workshop

November 17th 2022 14:00 – 18:00 CET

Agenda:

- 14:00 Overview Pervasive Encryption, Key Management and EKMF Web
- 15:15 TKE Demo
- 15:30 Hands on Lab: EKMF Web and Dataset Encryption
- 17:30 Cloud key demo, Key Management Considerations and Wrap-up

Managing your keys is a crucial element when implementing encryption. If you lose a key, you will lose all data encrypted with that key. EKMF Web is an exciting new IBM product that can simplify key management when implementing Pervasive Encryption Dataset Encryption.

Participants of this Virtual Workshop will learn about key management, key management considerations, EKMF Web Architecture and dataset encryption.

Virtual Class requires students to connect to Webex and have access to internet via browser to connect to virtual desktop.

Target Audience:

- Key Administrators
- z/OS Systems Programmer
- Security Analyst/Administrator

Speakers:

David Rossi

Cybersecurity Architect,
z Systems North America

Max Weiss

Security Solutions Engineer -
IBM Z Global Markets

Chelsea T Jean-Mary

Client Technical Specialist,
Washington Systems
